

New Symptoms Announced for Coronavirus

The Centers for Disease Control (CDC) added six symptoms to its list for COVID-19. We ask that you add these new symptoms to your screening process before anyone—including staff—enters the program.

New Symptoms

- Chills
- Repeated shaking with chills
- Muscle pain
- Headache
- Sore throat
- New loss of taste or smell

Symptoms Already In Place

- Shortness of breath
- Cough
- Fever

Symptoms may appear 2-14 days after exposure to the virus. People with these symptoms or combinations of two or more symptoms may have COVID-19. Once you observe these symptoms in yourself or an individual, please contact your programs nurse, who can assess the situation further.
